TYLO p.c

Injection

Tylosin tartrate + Thiamphenicol + Prednisolone acetate

Effective against gram positive, gram negative & mycoplasmal infections.
Composition:
- Tylosin tartrate 57.5 mg
- Thiamphenicol 200 mg
- Prednisolone acetate 5 mg

Description:
Tylo-PC gold is a broad-spectrum antibiotic and indicated for the treatment and control of conditions caused by or associated with tylosin and Thiamphenicol sensitive organisms in cattle, horse, calf, sheep & goat.

Indication:
For the treatment and control of a wide range of common systemic respiratory, gastrointestinal, septicemia and local infections caused by, or associated with organisms sensitive to tylosin and Thiamphenicol.

It is also used for the treatment of gram positive, gram negative & mycoplasmal infections.

Cattle, Buffalo: Pneumonia, bronchitis, pasteurellosis, metritis, foot-rot, mastitis, and septicemia.

Calf, goat and sheep: Pneumonia, pasteurellosis, mastitis-metritis-agalactia (MMA) syndrome, septicemia, bacterial diarrhea and enteritis.

Mode of Action:
Tylosin has a bacteriostatic effect on a susceptible organisms caused by inhibition of protein synthesis through binding to the 50S subunit of the bacterial ribosome.

Dosage and Administration:
Cattle & Buffalo: 3-6 ml/100 kg BW intramuscular injection
Calf, goat and sheep: 1ml/10 kg BW intramuscular injection.
Or, As directed by the veterinary physician

Withdrawal Period:
Meat: 21 days, Milk: 7 days,

Pack size:
100 ml vial.

Storage:
Store in a cool and dry place. Protected from light. Keep out of the reach of children.
