Horse: Administer 1 ml per 45 kg body weight by IV or IM route once a day for up to 5 days.

Storage condition & Expiry period:
Storage condition: Protected from light, store in a cool (below 25°C), and dry place.
Expiry period: 24 months after the date of manufacture

Withdrawal period:
Beef: 4 days, Milk: 24 hours.

Precautions before using:
- Use under recommendation of Veterinarian
- Do not use to animals showing hypersensitivity to Flunixin Meglumine
- Keep the recommended usage and dosage
- The drug should be given slowly when used intravenously
- Long-term treatment with NSAIDs might induce gastro-intestinal ulceration
- In horses, rare instances of anaphylactic-like reactions right after IV use and loss of appetite have been reported
- Tissue irritation at the injection site may occur when it is injected intramuscularly

Precautions for the people who use the product for the animals:
- Avoid direct contact with the skin
- Wash hands properly after use

Supply:
Glass vial of 10 ml and 25 ml.
